DETAILED ACTION

1. Applicant's arguments, see pages 2-5, filed 1/24/04, with respect to claims 1-18 have been fully considered and are persuasive. The Final Rejection has been withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Makoto (JP07-163077).

Makoto discloses fig.1-4 a component rotating machine comprising: a plurality of coils (6) each wound on the pole teeth of a core (B1-B8) through a bobbin (4). The bobbin having portions surrounding the pole teeth of the core (for receiving coil windings) and an integral terminal portion (72) spaced radially from the coil windings, a plurality of wiring conductors (8) carried by the bobbin winding receiving portions (17), each of the wiring conductors having one terminal end (16). Makoto also disclose, a bobbin having mating halves (4a4b) that encircle the pole teeth wherein, the conductor are all carried by one of the matting halves and the bobbin is formed, integrally, with a plurality of

internal wiring connectors (23) each being formed with a terminal hole (16A), into which a coil is led and a connecting block (21) to be inserted in both of the terminals holes to provide a connection circuit.

Referring to claims 5, no patentable weight has been given to the method of manufacturing limitations (i. e. molded) since "even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985)

Allowable Subject Matter

2. Claims 6-9 and 11-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claim 1-18 have been considered but are moot in view of the new ground(s) of rejection.
